# Method 1 : The Hands-ON Approach

This is a chart that will be extremely helpful for you to determine the ring size that you need. You can either make use of tape or a small piece of string to measure the area that will be occupied by the ring. When it becomes a complete circle, make a mark on such a string. This will be helpful for you to compare with the chart that is mentioned below. For extra width, you can add another size to accommodate.

Get a measuring tape, string or strip of paper.

Wrap it around the finger you'll wear your ring on.

Using a pen or marker, mark where the ends meet.

Lay your string or paper strip on a flat surface and use a ruler to measure the length in millimeters (mm).

This is the circumference of your ring.

Use the chart given below to map this circumference to the diameter.

Or the mapped diameter is your ring size.

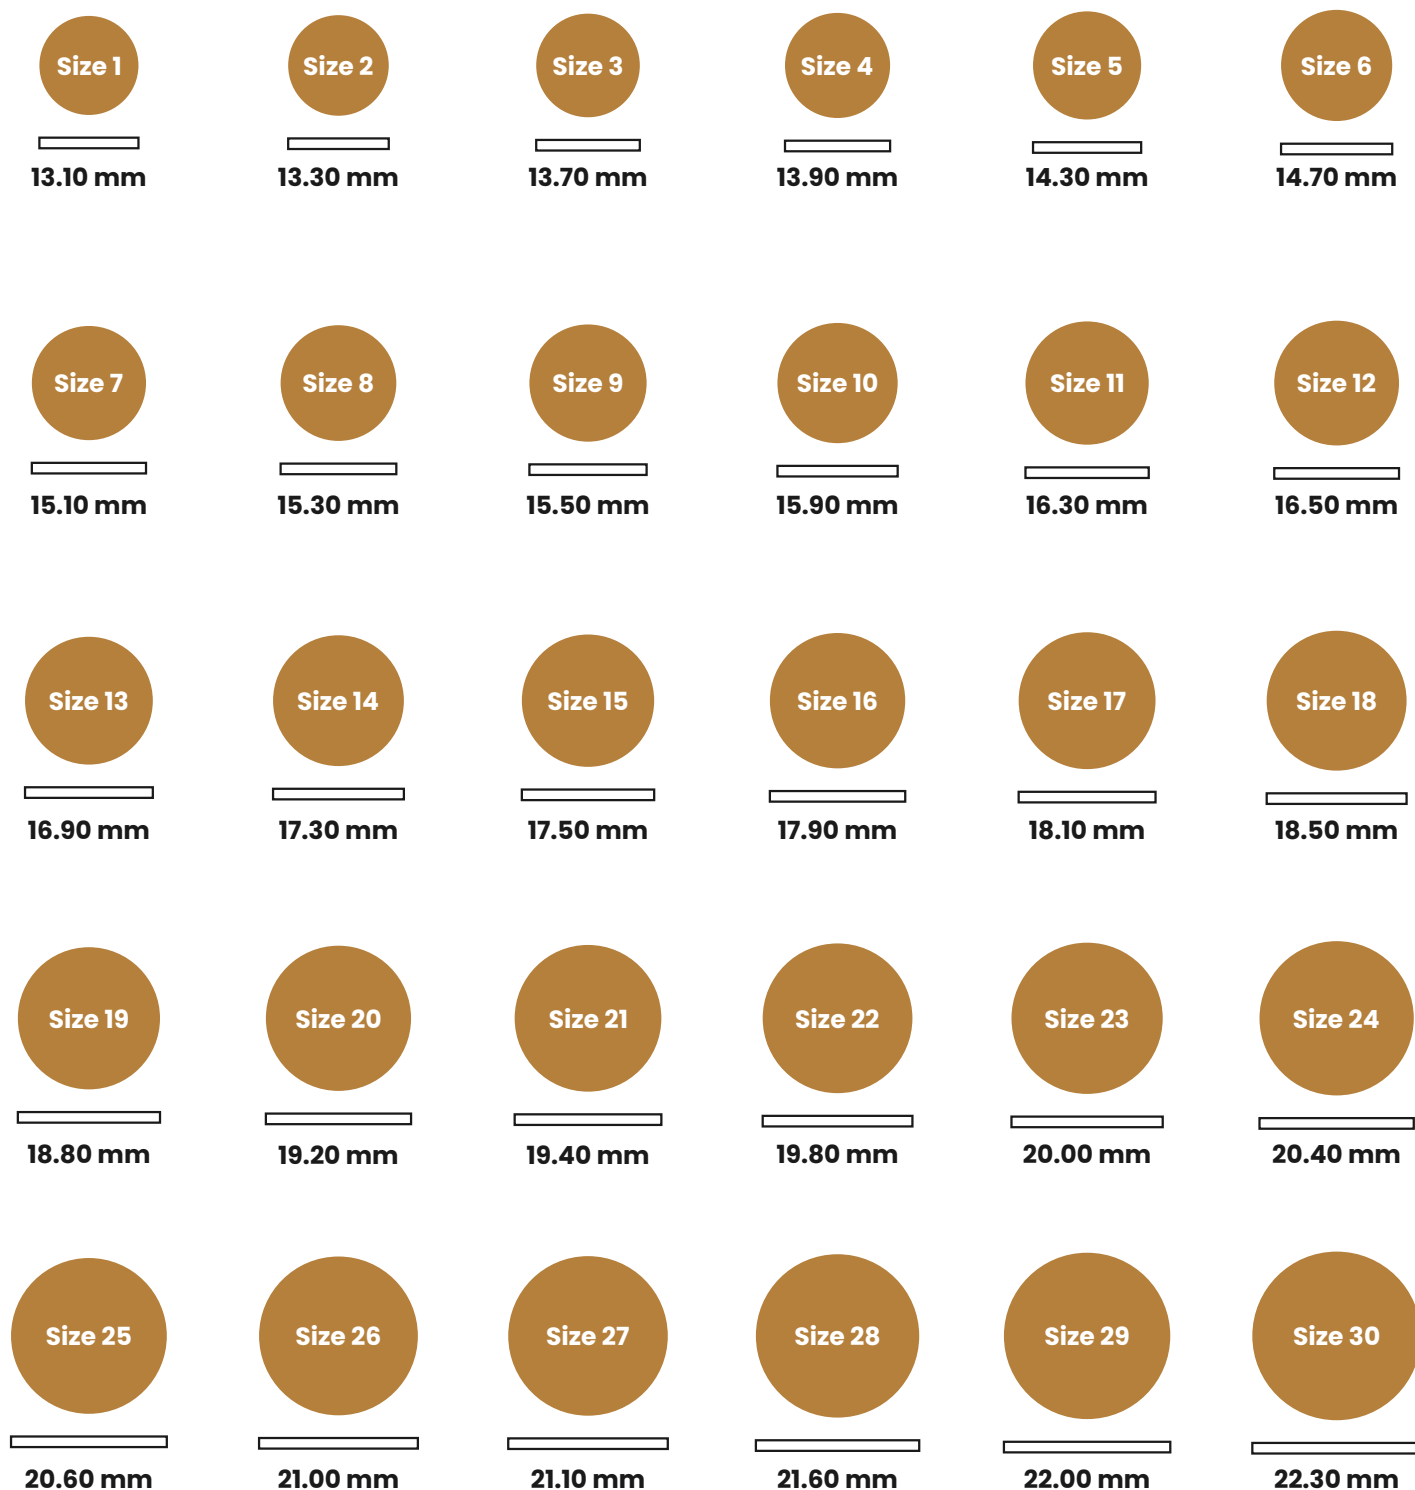

**FOR BEST RESULTS** : Measure during the end of the day, as your finger may be at its largest.

# Method 2 : Know your Ring Size by Circle

Step 1: Take a Finger Ring, Place it on the Circle.

Step 2: Measure the inner diameter

Step 3: Know your Ring Size
